

BARYT

BARYT

Baryt is a mineral filler with high density, high mechanical resistance, and high chemical and weather resistance. Due to this it is highly recommended as filler for anticorrosion coatings (including marine paints), powder coatings, industrial and general use industrial coatings. Barytes are widely used also in resin industrial floorings based on epoxy, polyester or PU resins.

solvadis polska began cooperation with Deutsche Baryt Industrie in distribution DBI barytes at Polish market. We have in our offer around 20 grades of barytes: from dark to very bright (brightness Ry from 80 to 94), with d50 from 17 to 1 micron.
